

1. Bree talked about the proposal put forward to divide WEGS to a biology and WEGS program
  - a. Problems: where to make the dividing line between a biology and a WEGS student
  - b. When you want to start a new program, you can't have Ph.D. students for a few years
2. Question about whether we should completely demolish WEGS or have WEGS with specialisations on our degrees
3. Another thing we should keep in mind is that if we go with splitting the program and lose the Ph.D. program, we may never get it back because the government is still debating on how to allocate graduate funding to small vs. large universities
