

**TGSA Executive Reports:**  
**October 24th, 2016**

**President:**

**TD Opportunity**

I have been contacted by a marketing representative about potentially having a joint event with the TGSA about a student budgeting android app.

**JUST research journal**

I am connecting with the JUST group as I would like a sit down conversation about how they are running their journal to get ideas about how we can run ours.

**CAGS conference**

I have registered for the conference and will be attending next week. I'd like to extend this invitation to the rest of the executive. This is a great opportunity to network!

**Program license concern**

Karen Everitt contacted the GSA about the lack of student licenses for software like NVIVO and ATLA.ti; I have been in contact with the IT/program software staff at the library to address this issue. It appears to me that some students are not aware that there is available software they can use at the library.

**VP Internal Affairs:** Working with Nona Robertson to track why grad students are getting weird extra dollars charged to their Traill College fees. Starting to organize Fall GM.

**VP Finance:** --

**VP Communications:** Nothing additional to report since last executive meeting.

**VP of Student Affairs:** I got approval from Micheal Eamon and Traill College to host our "eat and study" in the senior common room on Traill Campus.

Additionally, the risk management was approved by Sako. Ruth Walker emailed me to set up a date for the CASSC Wellness Subcommittee meeting. It was great to hear from someone in this regard and there will be a meeting soon. On another note, Sako and I are hoping to meet within the next couple of weeks to discuss what is usually looked for in risk management reports and safe successful events that has been hosted in the past—this will allow us to host safer events.

**Senator:** --
